NIKA GAGUA

Software & DevOps Architect · Head of the School of Computer Science

Software & DevOps Architect and Head of the School of Computer Science with 10+ years turning complex requirements into scalable, production-grade systems. I design cloud-native architectures and CI/CD delivery pipelines for enterprise and fintech, and I lead academic programs that prepare the next generation of engineers — bridging industry practice and education.

ACADEMIC LEADERSHIP

Newvision University

2025 – Present

Software Architect

Architect academic and platform software systems, applying microservices, modern API design and clean architecture principles. Mentor teams, guide technical decisions, and align academic programs with current industry practice — bringing real-world engineering into the classroom.

Kutaisi International University

2024 – Present

Head, School of Computer Science

Lead the School of Computer Science — owning curriculum modernization, faculty recruitment and examination management while driving the department's strategic growth. Collaborate with international faculty, assess and mentor students, and organize academic events and competitions that connect education with industry.

INDUSTRY & ENGINEERING

Steel International Trading LLC

2025 – Present

Software DevOps Architect

Own the cloud-native platform and the end-to-end delivery pipeline. Design and operate CI/CD automation, infrastructure-as-code and containerized deployments, backed by monitoring and observability that keep releases reliable, secure and repeatable. Set the DevOps standards — GitOps workflows, environment automation and incident-ready operations — so the team ships faster with confidence.

JSC MFO Swiss Capital

2024

Python & Odoo Developer

Built scalable Django services and customized the Odoo ERP for a microfinance institution. Designed PostgreSQL and MSSQL data models, implemented microservices for core financial workflows, and raised quality through code review, debugging and integration testing across the stack.

Elephant Fishing GmbH

2022 – 2024

Full-Stack Developer

Delivered full-stack web applications end to end in Python (Django, Flask, FastAPI) and JavaScript (Next.js, Vue). Containerized services with Docker and deployed across AWS, Google Cloud and Azure, establishing CI/CD pipelines, automated testing and cloud hosting for production workloads.

Solutions2Share Georgia

2022 – 2023

Software Tester & IT Support

Owned product quality through structured test scenarios and end-to-end validation. Automated the ticketing workflow, supported end users, and worked closely with developers to reproduce, document and resolve defects ahead of each release.

Upwork — Independent Software Consultant

2018 – Present

Full-Stack Developer & Solutions Architect

Deliver full-stack and architecture engagements for international clients on a continuous freelance basis — web applications, REST/GraphQL APIs, automation and cloud deployments. Take projects from requirements through design, implementation and delivery, with a strong record of repeat clients and long-term collaborations.

EARLIER CAREER

Samsung Electronics Georgia

2019 – 2022

Retail Merchandise Manager

Produced management reporting and training materials, monitored stock movement to surface growth opportunities, and trained consultants on product positioning and sales strategy at enterprise retail scale.
